

TOTAL SOLUTIONS. SEAMLESS PROJECT EXECUTION.

Siaron Medical provides clients in the Medical, Veterinary & Dental industries with a broad range of medical diagnostic solutions from project inception to completion - ensuring total customer satisfaction.

ISO-9001 certified quality control measures begin with our company's goal of constant improvement. Our "one-stop shop" business model enables our clients to streamline suppliers, reducing costs and ensuring maximum quality control across the entire lifespan of a project.

Whether your business is seeking a technical solution, a replacement system to upgrade your practice, or remarketing/recycling of a pre-owned system, Siaron can help to achieve results on time and within budget.

TRADE IN SERVICES. MAXIMUM RETURN, MINIMIZE RISK.

- Providing independent market prices on pre-owned equipment which are more competitive than some manufacturers' replacement programs.
- Commercial and technical services combine to provide a one-stop solution in the procurement, sale and removal process.
- Certified Environment Recycling even if your product has reached maturity and no longer has a resale value.

SOLUTIONS

TECHNICAL

- Backed by ISO 9001 Certification and following all necessary documentation, insurance and OEM procedures, Siaron's fully-insured installation and deinstallation services place an emphasis on thorough planning.
- Maximize productivity, minimize interruption by integrating with OEMs, hospital facilities, project managers & infection control.
- Latest state-of-the-art calibrated equipment to ensure your installation is completed to the highest standards.
- MRI helium / cryogen filling services.

MEDICAL STORAGE

- Clean, dust-free, temperature-controlled storage environment designed specifically for high-end medical imaging systems.
- From the moment your system enters our facility, it is professionally handled and stored in optimal conditions.
- Clinical cleaning services are provided in-house to improve infection control.
- MRI specialized services such as helium monitoring and chilled water systems for quality management at all times.

MEDICAL LOGISTICS

- In-house transportation and rigging team trained to handle high-end medical systems.
- Newly acquired transport fleet fully-equipped with air ride brakes and air suspension to meet the requirement for transporting sensitive medical systems.
- Fleet is equipped with "GPS Live Data" providing current information on truck location & driving performance.
- Combination of experience and technology ensures your system arrives on time and in perfect condition.

SALES

- Systems are carefully chosen, fully inspected, and clinically tested before removal - ensuring the new prospective owner receives the system in optimal condition with minimal risk.
- Pre-owned or refurbished medical systems for all modalities.
- Additional services such as system delivery including worldwide exportation, specialized crating, clinical cleaning, as well as installation, yielding a full turnkey solution.
- A regularly updated inventory provides varied systems to meet individual customer budgets & timeline requirements. Even if the system required is not currently in stock, our sales team can help!

THINK GREEN: DISPOSE RESPONSIBLY.

- Siaron Medical takes responsibility to ensure your system is disposed in an environmentally-friendly manner.
- Siaron has a dedicated Medical Device Recycling Centre designed to accommodate the special requirements needed for such medical systems.
- Certificate of Destruction issued for your records at the end of the process.
- Providing in-house testing of harmful PCB oils ensuring systems are safely transported and disposed correctly.

Let's recycle - we only have one world!
