

TOTAL SOLUTIONS. SEAMLESS PROJECT EXECUTION.

Siaron Medical provides clients in the Medical, Veterinary & Dental industries with a broad range of medical diagnostic solutions from project inception to completion- ensuring total customer satisfaction.

ISO-9001 certified quality control measures begin with our company's goal of constant improvement. Our "one-stop shop" business model enables our clients to streamline suppliers, reducing costs and ensuring maximum quality control across the entire lifespan of a project.

Whether your business is seeking a technical solution, a specialized delivery, rigging service, or disposal/recycling of an end of life system, Siaron can help to achieve results on time and within budget.

RIGGING & DELIVERY SERVICES.

SPECIALIZING IN MEDICAL DEVICE TRANSPORTATION.

- Positioned in the heart of British Columbia and strategically placed close to the airport and shipping routes. Our location combined with our local knowledge ensures a smooth delivery process.
- Specialized vehicles equipped with full air-brakes, air-ride suspension, and GPS tracking as standard.
- All projects are ISO-9001:2008 certified and extensively insured for all rigging, transportation and delivery services.

SOLUTIONS

TRANSPORTATION / RIGGING

- Experienced in-house transportation and rigging team trained to handle high-end medical systems.
- Newly acquired transport fleet fully-equipped with air ride brakes and air suspension to meet the requirement for transporting sensitive medical systems.
- Fleet equipped with "GPS Live Data," providing current information on truck location & driving performance.
- Fully-insured Canadian company offering reliable and cost-effective white glove delivery.
- Extensive specialized rigging equipment.
- Fixed or zonal pricing to meet operational budgets.
- Full inspection and detailed reporting for customers' peace of mind.

MEDICAL STORAGE

- Storage facility is fully alarmed and monitored 24-hours.
- Clean, dust-free, temperature-controlled storage environment suited to sensitive medical systems.
- Standard audits conducted to keep warehouse organized and up to date.

INFECTION CONTROL

- Siaron abides by hospital infection control protocols.
- Dedicated sealed infection control crates which are disinfected after each use to reduce cross-contamination.
- Exclusive for the medical industry only, trained professionals handle the system from start to finish.
- Extensive specialized rigging equipment suitable for hospital environments and disinfected after each use.

THINK GREEN: DISPOSE RESPONSIBLY.

- Siaron Medical takes responsibility to ensure your system is disposed in an environmentally-friendly manner.
- Siaron has a dedicated Medical Device Recycling Centre designed to accommodate the special requirements needed for such medical systems.
- Certificate of Destruction issued for your records at the end of the process.
- Providing in-house testing of harmful PCB oils ensuring systems are safely transported and disposed correctly.

Let's recycle - we only have one world!
